

Robertshaw

**We offer free capacity of our moulding shop
for small and medium-sized products**

We have **10-year experience in moulding**. We can produce **plastic moulded parts of various colours and materials** for you, from **1 to 150 g** based on your specification and for a majority of industries.

OUR TEAM

An excellent team of experienced professionals always finds a solution to your satisfaction. Our engineers will cooperate with you from the primary award of the order up to the final delivery to your premises.

WHAT IS OUR EXPERTISE?

WE OFFER

We offer capacity on 25 machines for injection moulding with pressure from 40 up to 220 tons, for the production of parts of all shapes and sizes

2D AND 2D MEASUREMENT & 3D PRINT

We regard 3D measurement of quality, X-ray inspection and precise inspection of each of your products as a matter of fact. 3D print of sample pieces and their functional testing. In case of need, we can also provide you with an assembly of additional items up to the final product on our robotic as well as manual lines in quality which has been proven by our long-term relationships with our customers and many certifying bodies.

TOOL SHOP

In our tool shop, we are capable of repairing or adjusting a mould immediately, avoiding unnecessary extra costs. Regular maintenance of the moulds is an absolute necessity.

MACHINES AND MATERIALS

We produce moulding machines of the following brands
- **ARBURG, FANUC, ENGEL, Witman Battenfeld.**

We work with a wide portfolio of granulates
- **ABS/PC/PA66/POM/PP/PBT.**

TECHNICAL SOLUTIONS

We can debug the production process based on the customer's requirements. We focus on reducing production costs, adjusting and innovating existing products.

■ **HIGH PRODUCTIVITY AND QUALITY** ■
